ForeignExchange Audio Conferences Reach Milestone

Educational series has attracted 10,000 attendees since 2002

Waltham, MA, September 22, 2006 – ForeignExchange Translations, Inc., the global leader in providing linguistic services to medical device, pharmaceutical and biotechnology companies, this week passed an attendance milestone with its educational audio conference series. More than 10,000 life sciences executives have now taken advantage of the expert advice available through ForeignExchange audio conferences, on current and varied topics such as CE marking, risk management, alternative sites for clinical trials, and Japan’s revised Pharmaceutical Affairs Law.

“When we produced our first audio conference four years ago, we envisioned it as a value-added service for our clients,” says ForeignExchange president Andres Heuberger, “but we never dreamed of this level of response. It’s obvious there exists a real hunger within the life sciences for the kind of expert guidance our speakers provide.”

Heuberger says ForeignExchange will meet the challenge by ramping up conference production efforts over the next year, and will host its 100th event later this year.
